DETAILED ACTION

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the elements identified by numerals 228,216,214,220,222,234,224, must be shown or the feature(s) canceled from the claim(s). The numerals identified above do not specifically identify any structure in figure 1a, but merely point in a general direction of the overall device. No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended."

If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d).

Art Unit: 1744

If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because of the following informalities: page 14, line 4 the specification identifies "robotic mechanism 230". However, the numeral 230 does not appear anywhere in the drawings.

Appropriate correction is required.

Claim Objections

Claims 94,96,103 are objected to as being improperly dependent.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1,47-64,70-81,86-97,99,100,103,104,124 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The preamble of the claims identifies the invention as an apparatus. However, the body of the claims defines the elements of the apparatus not by their structure but by the function they perform (see claim 1, "a mechanism for incubating...").

The rules require (37 CFR 1.75 (d) and MPEP 2181) that if applicant chooses to define a device by it's function instead of it's corresponding structure applicant must use the

Art Unit: 1744

proper format (means-plus-function) and it must be clearly described in the specification what structure corresponds to the specific function being claimed.

In the instant claims the "mechanism for incubating"; "mechanism for automatically determining"; "a mechanism for individually controlling"; and "a mechanism for individually tracking and identifying" do not comply with this requirement. Applicant needs to use the proper "means-plus-function" language and identify in the specification what structure corresponds to the specific "means-plus-function" element.

Response to Arguments

Applicant's arguments, filed 4/11/2005, with respect to the prior art rejections have been fully considered and are persuasive. The prior art rejections has been withdrawn.

Allowable Subject Matter

Claims 114-123 are considered to be allowable over the prior art of record.

Claims 1,47-64,70-81,86-97,99,100,103,104,124 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).
